

Product Specification and Technical Data

PRODUCT: BG 404
Low VOC Non-Chlorinated Brake Cleaner

PART NO.: 404

TEST DATA:	Test	ASTM Test Method	Typical Test Results
	Appearance	Visual	Clear/Colorless
	Specific Gravity (H ₂ O = 1)	D 1298	0.8022
	Flash Point, TCC	D 56	-18°C (-0°F)
	Relative Evaporation Rate (N-butyl acetate).		<1

PROBLEM: Aerosol brake cleaners of the past have relied mostly on non-flammable chlorinated solvents as the main cleaning ingredient in tackling the problem of built-up brake fluid, grease, oil and other residue on brake assemblies. These solvents, however, are among the most damaging materials to the Earth's protective ozone layer. BG Products now provides a safe, effective, non-chlorinated brake cleaner for both consumer and professional use.

SOLUTION: BG 404 Low VOC Non-Chlorinated Brake Cleaner will improve the efficiency of braking systems and eliminate brake squeal and brake chatter. Its fast-acting solvents quickly remove brake fluid, oil, grease, moisture and other residue from both drum and disc brake assemblies. Environmentally safe. Motor oil or other disposable materials may be safely recycled even if BG 404 is present in them. This product is a VOC compliant product specifically for use in the state of California.

- BENEFITS:**
- Rapidly degreases all brake components such as brake linings, drums, cylinders, springs, disc brake pads and components such as CV joints, etc.
 - Restores braking performance by removing harmful wear debris
 - Does not contain ozone damaging CFCs

USAGE: SHAKE WELL before using. Spray liberally on areas to be cleaned. Allow to air dry or wipe with a soft, clean cloth. If necessary, repeat application. **CAUTION!** Avoid spraying on painted surfaces.

BG Products, Inc., accepts no liability for excessive use or misuse of this product.
